

## A Guide for Residents

Mold Growth:

# JUST ADD WATER

*Mold can grow in almost  
any temperature!*

*Different types of mold  
grow in different  
temperatures*

*Food sources can be  
anything organic!*

*(ex. wallboard, fabrics,  
dust trapped in other  
materials (carpet))*

*ALL YOU NEED IS WATER! FOR SOME MOLD, THE TINY  
DROPLETS THAT FORM ON COLD WINDOWS IS ENOUGH!*

*“Some mold is present in every home and does not necessarily pose a  
health hazard when not growing on water-damaged material”*

*-Connecticut Department of Public Health*
